

FIRSTFORM
building the best comes first

“Our goal at CORE Health and Fitness is to provide state-of-the-art training facilities with the absolute best artificial turf and rubber flooring surfaces available. We believe we found both in FirstForm. Their PrimePlay synthetic turf looks and feels like none-other. Our boot camp participants notice a big difference in how their bodies respond to exercise stress when done on the new surface. They are amazed at how much more they can achieve during the workouts because of the reduced pain they feel in their joints, mainly knees and back. I love how our athletes always reach down and touch the surface because they just can’t believe how much it feels like real grass. PrimePlay has exceeded our expectation - whether it is one of our young athletes looking to aggressively push their bodies or one of our elderly patrons looking to stretch and strengthen their core - the field meets all of our needs. I would recommend PrimePlay to everyone looking to purchase a synthetic turf field or rubber flooring surface.”

“CORE’s new turf field feels like real grass under my feet. It’s not too soft or spongy like other turf fields we have here in the Houston area. And I love that the infill stays in the grass and doesn’t come home with me in my clothes or shoes. I look forward to my classes even more because of their new field. It is definitely the best artificial turf surface I’ve ever seen.”
