

**FIRSTFORM**  
building the best comes first

## The Gilman School

5407 Roland Ave, Baltimore, MD 21210

“Our PrimePlay™ Replicated Grass field from FirstForm has been well received by our coaches and athletes. After our first football game, they commented on how much it looked and played like a natural grass field. I noticed immediately that there were less turf abrasions than we typically see after playing on conventional crumb rubber fields and I think it is attributed to the type of infill FirstForm uses as well as the dense fibers. You really do run, tackle, and slide on the synthetic turf. We have also been studying our PrimePlay field and have already noticed a 50 degree temperature reduction during hot summer days compared to our other turf field on campus, and an almost 60 Gmax reduction between the two. We are confident we have a field that allows our athletes to play at their best, while also giving them the highest safety technology available in the synthetic turf industry today.”
