Re: My Personal Recommendation and Endorsement of SportsField Engineering.

Dear Colleagues,

I would like share my personal experience with SportsField Engineering. We got involved with them while working on a project through my organization, Staten Island United Federation Baseball.

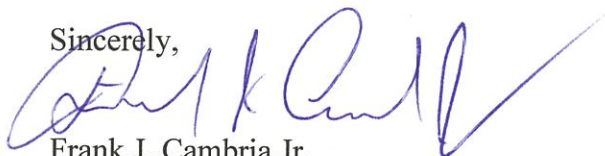

During the bidding process for synthetic fields and a possible indoor hitting facility, we encountered many companies willing to bid on our requests. And frankly, it was the quality of SFE's new synthetic turf that peaked my interest to even meet with them as it was the best turf my organization had ever seen. But for so many other reasons I am very glad to have partnered with SFE. There were some serious hurdles in getting our project started. There were many design and cost issues that we were struggling to work through. That was when SportsField Engineering really shined and helped us overcome those obstacles. My experience with them helped to turn a very difficult process into an exciting facility for our organization that was within our budget. This was accomplished due to the hard work, honesty, and customer service excellence of the SFE team.

From start to finish, their experts worked with our entire staff to address all of the issues and concerns in the design of our field and I couldn't be more appreciative of their efforts. The SFE staff really listened to what we needed and created a solution that was a perfect fit for us.

SportsField Engineering brought real value to our organization and we will always be grateful. We consider ourselves fortunate to have a working relationship with such good people and are already planning our next project with their organization.

Please feel free to contact me to discuss anything related to SportsField Engineering.

Sincerely,

Frank J. Cambria Jr.
President
