Jennifer Gill
Superintendent

To Whom It May Concern:

Micheal Grossen
Principal

In late 2013 the Springfield High School Booster Club, engaged Sports Field Engineering to design and install a new synthetic playing surface for Springfield High School. The project was completed in the Spring of 2014.

Springfield High School students and community members continue to enjoy countless hours of playing time on our high quality, high performance synthetic playing surface. Anecdotal feedback from visiting schools and players has been one word, "Wow!" We are very proud to enjoy and show off our field that we believe is the highest quality synthetic playing surface in the state.

Our experience with SFE has been nothing but positive. The company has been attentive to Springfield High's needs and has worked well with our staff and Booster Club representatives in the design of the project as well as contractual arrangements.

I would recommend Sports Field Engineering to anyone who may be considering an upgrade to their playing surface or any other service that SFE provides. They have demonstrated a long term commitment to Springfield High School.

Please feel free to contact me directly if you would like to discuss this further.

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Grossen", with a long horizontal flourish extending to the right.

Mike Grossen
