Re: Endorsement of FirstForm, Inc.

Dear Colleagues,

It is with pleasure that I recommend FirstForm for your consideration of athletic field improvements. We began an ambitious campaign in 2016 to create championship synthetic turf fields at each of our (8) eight county schools. FirstForm bid aggressively and has surpassed all expectations for professionalism and deliverables on our project.

They have gone above-and-beyond offering complimentary advisement to our local architects and engineers on best practices for design of their new technology turf system. And their general contractors have been the best we have seen getting excavation and base construction completed on time, on budget, and to spec.

Lastly, the quality of their PrimePlay Replicated Grass synthetic turf product is second to none. We were looking for an alternative to SBR crumb rubber and FirstForm provided us the ideal natural grass looking artificial alternative. It really does look and play like natural grass; it's considerably cooler than the black pellet turf fields our teams play on; and our coaches and athletes are pleased with the playability and safety profile it delivers.

I would recommend FirstForm to anyone who may be considering a field project. The company continuously demonstrates attentiveness to our needs and a long-term commitment to our school system, which is very important to me and the district.

Please feel free to contact me directly if you would like to discuss FirstForm or our project.

Sincerely,
